INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

International application No.	Applicant's or agent's file reference P27-051PCT				
This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of		International filing date (day/month/year)			
according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of					
the text is approved as submitted by the applicant. the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority. 6. With regard to the drawings, a. the figure of the drawings to be published with the abstract is Figure No. 4 as suggested by the applicant.	This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of sheets. It is also accompanied by a copy of each prior art document cited in this report. 1. Basis of the Report a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item. The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)). b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see Box No. I. Certain claims were found unsearchable (See Box No. III) 4. With regard to the title, the text is approved as submitted by the applicant.				
as selected by this Authority, because this figure better characterizes the invention. b. none of the figures is to be published with the abstract.	the text is approved as submethe text has been established may, within one month from 6. With regard to the drawings, a. the figure of the drawings to be as suggested by the as selected by this as selected by the selected by this as selected by this as selected by the s	th, according to Rule 38.2(b), by this Authority in the date of mailing of this international sear published with the abstract is Figure No. 4 applicant. Authority, because the applicant failed to sugnature the applicant publicant characters.	ch report, submit comments to this Authority. gest a figure.		

Form PCT/ISA/210 (first sheet) (January 2004)

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/09506

A. CLASSIFICATION OF SUBJECT MATTER					
IPC(7) : C07C 229/00 US CL : 560/9, 10, 15, 16, 19, 37, 38, 41, 47, 100, 103, 105.; 562/ 405, 426, 427, 422, 441, 442, 443, 490.					
US CL : 560/9, 10, 15, 16, 19, 37, 38, 41, 47, 100, 103, 105,; 562/ 405, 426, 427, 422, 441, 442, 443, 490, According to International Patent Classification (IPC) or to both national classification and IPC					
B. FIELDS SEARCHED					
Minimum documentation searched (classification system followed by classification symbols) U.S.: 560/9, 10, 15, 16, 19, 37, 38, 41, 47, 100, 103, 105,; 562/ 405, 426, 427, 422, 441, 442, 443, 490,					
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched None					
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used) Files REGISTRY and CAPLUS on STN					
C. DOCI	JMENTS CONSIDERED TO BE RELEVANT				
Category *	Citation of document, with indication, where appropriate, of the relevant passages		Relevant to claim No.		
Х	Ma, Yu-Ting et al. Mechanistic Studies on Human Platelet Isoprenylated Protein Methyltransferase:Farnesylcysteine AnalogsBlock Platelet Agrregation without Inhibitiong the Methyltransferase, Biochemistry (1994), 33(18), 5414-20 (Abstract), Columbus, OH, USA, Chemical Abstracts [online][retrieved on 13 March 2005], Abstract Number 1994:502712				
х	Xu, Yajun et al. Inhibition of Captive Ca2+ Entry into Cells by Farnesylcysteine Analogs, Molecular Pharmacology (1996), 50(6), 1495-1501 (Abstract) Columbus OH, USA Chemical Abstracts [online] [retrieved 15 Mar 2005] Abstract Number 1997:6502.		1-3, 6, 9, 13, 14, 16, 17, 18, 19, 20 and 22		
х	Gibbs, Richard et al. An NMR Method for Elucidating the Sterochemistry of Protein Farnesylation, Bioorganic & Medicinal Chemistry Letters (1993), 3(2), 281-4 (Abstract) Columbus, OH, USA Chemical Abstracts [online] [retrieved on 15 March 2005] Abstract Number 1993:409142				
Further documents are listed in the continuation of Box C. See patent family annex.					
	I categories of cited documents: "T" later document published after the international filing date or particular date and not in conflict with the application but cited to understance principle or theory underlying the invention "X" document of particular relevance; the claimed invention cannot be application and the principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or theory underlying the invention cannot be application but cited to understance principle or the constance principle or the constanc		ation but cited to understand the ntion		
"E" carlier app	plication or patent published on or after the international filing date	considered novel or cannot be consider when the document is taken alone			
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)		"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination			
"O" document	referring to an oral disclosure, use, exhibition or other means	being obvious to a person skilled in the	e art		
"P" document published prior to the international filing date but later than the "&" document member of the same patent family priority date claimed			family		
Date of the actual completion of the international search Date of mailing of the international search A PR 2005		ch report
